Mohamed Mahmoud Hamed

Product Owner — AI-Enabled Products & Product-Led Growth | PSPO I

New Cairo, Egypt | +20 101 961 3401 | Mohamed7amed135@gmail.com | linkedin.com/in/mohamedhamed-po

SUMMARY

Product Owner since 2025, currently managing four web and mobile products with combined budgets above 1,000,000 SAR. I work every day with engineering and design teams in Egypt, the UAE and Saudi Arabia. I build AI features into my products, such as an AI CV builder and AI tutor matching, and I use Claude and Claude Code to prototype ideas, test user flows and write requirements before handing them to engineering. I focus on growth from day one by tracking activation, retention and conversion, and I use the data to decide what to build next. I have launched marketplace and booking products from early stage, including payment gateway integration. PSPO I certified and PSPO II trained.

SKILLS

AI and Prototyping: Claude, Claude Code, AI product features, AI prototyping, idea testing, writing requirements with AI, Figma prototypes

Product Led Growth and Data: activation, retention, conversion, user onboarding, funnel analysis, KPIs, A/B testing, NPS, Evidence Based Management, Google Analytics, Mixpanel, Firebase, Power BI

Product Management: product roadmap, product vision, prioritization, product backlog, MVP, release planning, user stories, acceptance criteria, PRD, BRD

User Experience and Design: user flows, user research, customer interviews, usability testing, UAT, competitive analysis, wireframes, Figma, Adobe XD

Technical: payment gateway integration, REST APIs, system integration, ASP.NET Core, React, TypeScript, iOS and Android apps, Git, CI/CD

Agile and Collaboration: Scrum, Kanban, sprint planning, backlog refinement, working with engineers and designers, stakeholder management, product launches

Tools: Claude, Claude Code, Figma, Jira, Confluence, Mixpanel, Firebase, Google Analytics, Power BI, Trello, Asana, Monday.com

EXPERIENCE

Product Owner — Bonyad

Remote · teams in Egypt, UAE & KSA | 2026 – Present

Four products, combined budgets above 1,000,000 SAR

- Own the roadmap and backlog for four web and mobile products, and decide what to build and what to skip based on value and data.
- Use Claude and Claude Code to build quick prototypes, test user flows and draft user stories before work goes to engineering.
- Set activation, conversion and retention goals for each product, review the numbers after every release and update priorities.
- Design and improve user flows from onboarding onwards, and test ideas with real users together with the UX team.
- Work with engineers every day on technical choices, API needs and estimates, and write clear user stories with acceptance criteria.
- Connect business stakeholders with the technical team, handle conflicting requests and share regular progress updates.

PRODUCTS AT BONYAD

Mafeshsho8l — AI Job-Search Platform | *live on iOS and Android | Egypt | 2026 – Present*

- Took the app from an empty backlog to launch on the App Store and Google Play.
- Defined the first AI features, an AI CV builder and an AI skills gap roadmap, based on research with job seekers.
- Tracked installs, activation and retention, and used the results to set priorities every sprint.

Droob — AI-Enabled Premium Learning Platform | *live on iOS | Saudi Arabia | 2026 – Present*

- Owned the product from idea to launch, including student and tutor research and competitor analysis.
- Kept the first release focused on matching students with verified tutors, which helped launch faster.
- Tracked tutor sign ups, booked sessions and returning students to improve retention.

Quick-In — Chalet & Vacation Booking Platform | *North Coast & El Gouna, Egypt | 2026 – Present*

- Turned a general request for a booking website into a clear product goal and a prioritized backlog.
- Wrote the user stories for host dashboards, guest booking and live availability.
- Led QA and user acceptance testing so the booking flow worked well at launch.

Product Owner — Juleative

Remote · UAE & Egypt | 2025 – 2026

Several client products at the same time

- Met with clients in discovery sessions and turned their needs into a backlog the team could start on within a week.
- Led feature prioritization and UI/UX review sessions, balancing user needs with deadlines.
- Wrote proposals, SOWs and product documents, and removed blockers early to keep releases on time.

PRODUCT AT JULEATIVE

> **Hub Drive — Car Rental Marketplace, Legacy Digital Transformation** | *UAE market | 2025 – 2026*
> - Led the full rebuild of an old platform into a new marketplace (ASP.NET Core, React, TypeScript, admin panel, driver app) launched on the App Store.
> - Presented a three phase release plan to executives, releasing in small steps instead of one big launch.
> - Put vendor onboarding first because it was the key to growing supply on the marketplace.

CERTIFICATIONS

- **Professional Scrum Product Owner I (PSPO I)** — Scrum.org, June 2026 (certificate 1331062)
- **PSPO II Training (Advanced Product Owner)** — Scrum.org: Evidence Based Management, product strategy, advanced backlog management
- **Foundations of Project Management** — Coursera, December 2025
